

Gordon Campbell broke his promise ...

... to value their work and honour their contracts.

The consequences are devastating.

Tens of thousands of health care workers – mostly women – have either lost their jobs to privatization or had their wages cut by 15 per cent.

And newly privatized health care workers now earn \$10 an hour with few benefits and no job security.

And he didn't stop there.

The Campbell Liberals cut funding to women's centres, legal aid and social services.

And by cutting long-term care beds, they've created a health care crisis and put more pressure on women and their families.
