## Protect and strengthen public health care in B.C.

### *Speak out now against the Campbell government's Bill 21*

The BC Health Coalition has launched a campaign to oppose *Bill 21* – the new provincial health care legislation being pushed through the B.C. legislature right now.

Please take a minute to add your voice to the campaign.

*Bill 21* uses code words like “sustainability” and “individual choice” to justify cuts to services, more user-fees and the increased transfer of public health care dollars to private clinics and insurance companies.

Show the government that British Columbians want investments in the proven and cost-effective public solutions that will strengthen health care services for all.

For more information on *Bill 21* and the BCHC campaign, visit the BC Health Coalition website <<http://www.bchealthcoalition.ca/>>.
