Maintenance benchmark review series recently concluded

As part of the “page 207” benchmark review series – negotiated in the 2006-2010 facilities subsector collective agreement – the Facilities Bargaining Association (FBA) and the Health Employers Association of British Columbia (HEABC) have reached agreement on several new benchmarks in the maintenance job family.

The review – which included Maintenance Workers, Groundskeepers and Maintenance Supervisors – resulted in revisions to 14 benchmarks in that series class.

In addition, the Radiographic Processor Maintainer and Groundskeeper 1 benchmarks were deemed redundant, and therefore deleted.

The revised benchmarks are to be implemented on October 2.

October 1, 2009
